VOLUME 40 1987

SUBJECT INDEX

Acetaldehyde, 393
  alcohol
  cerebral benzodiazepine receptor complex
  GABAergic neuron binding
  salsolinol
Acetylcholine chloride, 781
  bradykinin
  chickens
  immobility response
  nociceptive stimulation
  oral stimulation
Acquisition, 411
  age differences
  ethanol tolerance
  hypothermia
  withdrawal
ACTH
  avoidance, 677
  behavioral performance, 33
  exploratory activity, 33
  forced swimming, 33
  immobilization, 165
  memory, 677
  noncontingent footshock, 677
  passive avoidance response, 677
  pituitary-adrenal activity, 33
  pituitary-adrenal axis, 165
  stress, 165
  stress, chronic, 33
ACTH levels, 775
  fixed ratio schedule
  plasma corticosterone levels
  prolactin levels
  shock avoidance
  stress, chronic
Activity rhythm, 767
  circadian rhythm
  dose-dependent effects
  lesions, electrolytic
  lesions, suprachiasmatic nucleus
  methamphetamine
  suprachiasmatic nucleus
Acute hypometabolism, 603
  human studies
  insulin
  plasma thyroid hormones
  thyroid stimulating hormone
  transcendental meditation
Adrenal development, 29
  body weight gain
  chronic noise stress
  food intake
Adrenalectomy
  analgesia, 597
  benzodiazepines, 479
  dexamethasone, 597
  diet palatability, 479
  opiate antagonists, 479
  selective breeding, 597
Adrenaline concentrations, 323
  circadian rhythms
  corticosterone levels
  plasma noradrenaline
Adrenergic drug effects, 725
  REM sleep deprivation
  strain differences
  swimming
Adrenergic receptors, 555
  lizard skin
  melanocyte stimulating hormone
  propranolol
Age differences
  acquisition, 411
  differential reinforcement of low rates performance, 271
  ethanol tolerance, 411
  hypothermia, 411
  withdrawal, 411
Aggression
  analgesia, 207
  cats, 207
  central gray, cats, 207
  dominant/subordinate relationships, 661
  flank glandectomy, 661
  hamsters, 661
  Japanese quail, 343
  locomotor activity, 343
  naloxone, 207
  pecking activity, 343
  scent marking, 661
Alcohol, 393
  acetaldehyde
  cerebral benzodiazepine receptor complex
  GABAergic neuron binding
  salsolinol
Alcohol intake, 387
  socio-pharmacological study
  stress
Alpha adrenoceptors, 747
  clonidine
  drug interaction
  methoxamine
  penile reflexes
  sexual behavior, male rats
  ST-91
Amphetamine, 741
  circling direction
  lesions, 6-hydroxydopamine
  lesions, lateral substantia nigra pars compacta
  lesions, medial substantia nigra pars compacta
  lesions, pars reticulata
Analgesia
  adrenalectomy, 597
  aggression, 207
  cats, 207
  central gray, cats, 207
  centrifugal rotation, 201
  cold-water swims, 39
  conditioned flavor aversions, 201
  deer mice, 559
  dexamethasone, 597
  gender-specific effects, 39
  gonadectomy, 39
  hypothermia, 39
  locomotor activity, 559
  magnetic field inhibition, 559
  morphine, 559
  naloxone, 207
  pain, 39
  selective breeding, 597
  sex differences, 559
  stress, 39
Androgens, 527
  monkeys, males
  sexual behavior, male monkeys
Angiotensin II
  calcitonin, 515
  dipsogenesis, 515
  ICV administration, 515
  intragastric infusion, 539
  sham drinking, 539
  third ventricle, 515
Anorexia, 297
  cachexia
  tumor excision
  tumor-induced diet aversions
Anterior basal lobe, 329
  cuttlefish
  lesions, anterior basal lobe
  predatory behavior
Apparatus
  gustatory onset detector, 255
  multiple channel amplifier, 127
  radial arm maze, 739, 799, 805
  radial maze, 731
  T-maze, 181, 785
  Y maze, 263
Arousal, 617
  epilepsy
  fish/roach comparisons
  penicillin
Asymmetry
  dopaminergic system, 607
  estradiol, 267
  hypothalamic responsiveness, 267
  lateralization, 607
  rats, females, 267
  sexual behavior, 267
  spatial preference, 607
Attractivity, 737
  castration
  estradiol
  progesterone
Aversion, 625
  hypothalamic stimulation
  mesencephalic central gray
  switch-off responses
Avoidance, 677
  adrenocorticotropic hormone
  memory
  noncontingent footshock
  passive avoidance response
Avoidance responding, 447
  diabetes mellitus
  social behavior

Barpressing, punished, 7
  counterconditioning
  lesions, dorsal noradrenergic bundle
  stress tolerance
Basolateral limbic circuit, 291
  lesions, amygdala

lesions, thalamus
self-stimulation
spontaneous motor activity
Behavior, 473
sensory function
vitamin B-6 deficiency
Behavioral lateralization, 785
brain asymmetry
dopaminergic system
monoaminergic system
T-maze
Behavioral performance, 33
adrenocorticotropin
exploratory activity
forced swimming
pituitary-adrenal activity
stress, chronic
Behavioral pharmacology, 793
radial arm maze
Behavioral stimulation, 681
body weight
selective breeding
Benzodiazepines, 479
adrenalectomy
diet palatability
opiate antagonists
Body temperature
circadian rhythm, 17
entrainment, 17
fever, 85
human studies, 17
indomethacin, 85
lesions, anodal medial preoptic, 85
lesions, cathodal medial preoptic, 85
lesions, electrolytic, 85
medial preoptic area, 85
sleep-wake schedule, 17
zeitgebers, 17
Body weight, 681
behavioral stimulation
selective breeding
Body weight gain, 29
adrenal development
chronic noise stress
food intake
Blood variables, 229
drinking
human studies
hypohydration
thirst
Blood volume redistribution, 171
dogs
low ambient temperature
norepinephrine
plasma osmolality
thirst suppression
Bradykinin, 781
acetylcholine chloride
chickens
immobility response
nociceptive stimulation
oral stimulation
Brain
amygdala, 291, 527
anterior basal lobe, 329
anterior hypothalamus, 717
brainstem, 317
central gray, 207
cerebral cortex, 237
dentate area, 147
dorsal noradrenergic bundle, 7
dorsal obex area, 317
entorhinal cortex, 147
fimbria fornix, 731
frontal cortex, 317
frontal lobe, 785
hippocampus, 147, 497, 785
hypothalamus, 237, 267, 317, 501, 527
lateral hypothalamus, 189, 625
lateral substantia nigra pars compacta, 741
medial hypothalamus, 695
medial prefrontal cortex, 291, 383
medial preoptic area, 85
medial substantia nigra pars compacta, 741
mediodorsal nucleus of the thalamus, 291
mesencephalic central gray, 625
nucleus accumbens, 785
nucleus sphericus, 759
pars reticulata, 741
periaqueductal grey, 55
preoptic area, 527
septum, 759
striatum, 785
substantia nigra, 785
suprachiasmatic nucleus, 767
ventral hippocampal commissure, 181
ventral tegmental area, 785
Brain asymmetry, 785
behavioral lateralization
dopaminergic system
monoaminergic system
T-maze
Brightness discrimination, 263
scopolamine
perseveration
visual reversal
Brown adipose tissue, 409
corticosterone inhibition
2-deoxy-D-glucose
intracerebroventricular effects
thermogenesis

Cachexia, 297
anorexia
tumor excision
tumor-induced diet aversions
Caesarian section
distal exposure, 47
hormonal influences, 307
maternal behavior, postpartum, 47
ovariectomy, 307
postpartum maternal responsiveness, 307
pup experience, 47
responsiveness, 47
Calcitonin
angiotensin II, 515
dipsogenesis, 515
food intake, 501
ICV administration, 515
third ventricle, 501, 515
Caloric load responses, 577
food intake
human studies, women
hunger
satiety
Capsaicin, 337
drug comparisons
epinephrine
food intake
glucagon
meal patterns
Carbohydrates
dietary self-selection, 155
food intake, 155
polysaccharides, 563
protein, 155
taste preference, 563
tryptophan, 155
Cardiovascular responses, 1
cats
endogenous opiates
exercise
naloxone
Castration
attractivity, 737
cholecystokinin, 25
estradiol, 25, 737
food intake, 25
gonadectomy, 25
progesterone, 25, 737
sex differences, 25
testosterone, 25
Catecholamine levels, 317
clonidine suppression
drug interaction
schedule-induced polydipsia
Cats
aggression, 207
analgesia, 207
cardiovascular responses, 1
central gray, cats, 207
delta sleep-inducing peptide, 569
electroencephalogram, 569
endogenous opiates, 1
exercise, 1
naloxone, 1, 207
sleep, 569
subcutaneous administration, 569
Central gray, cats, 207
aggression
analgesia
cats
naloxone
Centrifugal rotation, 201
analgesia
conditioned flavor aversions
Cerebral benzodiazepine receptor complex, 393
acetaldehyde
alcohol
GABAergic neuron binding
salsolinol
Chemosensory recognition, 65
individuality
Major Histocompatibility Complex
strain differences
urine
Chickens, 781
acetylcholine chloride
bradykinin
immobility response
nociceptive stimulation
oral stimulation
Cholecystokinin, 25
castration
estradiol
food intake
gonadectomy
progesterone
sex differences
testosterone

Chronic noise stress, 29
adrenal development
body weight gain
food intake
Circadian rhythm
activity rhythm, 767
adrenaline concentrations, 323
body temperature, 17
corticosterone levels, 323
dose-dependent effects, 767
entrainment, 17
ferrets, females, 717
hamsters, 583
human studies, 17, 437
lesions, anterior hypothalamic, 717
lesions, electrolytic, 767
lesions, suprachiasmatic nucleus, 767
macronutrients, 437
methamphetamine, 767
motor activity, 717
plasma noradrenaline, 323
reproduction, 717
reproductive behavior, hamsters, 583
sleep-wake schedule, 17
social stimuli, 583
spontaneous meal patterns, 437
suprachiasmatic nucleus, 767
zeitgebers, 17
Circling direction, 741
amphetamine
lesions, 6-hydroxydopamine
lesions, lateral substantia nigra pars compacta
lesions, medial substantia nigra pars compacta
lesions, pars reticulata
Clonidine, 747
alpha adrenoceptors
drug interaction
methoxamine
penile reflexes
sexual behavior, male rats
ST-91
Clonidine suppression, 317
catecholamine levels
drug interaction
schedule-induced polydipsia
Cognitive function, 799
memory
mnemonic function
neurotoxic agents
radial arm maze
Cohabitation, 177
inbred strain
maternal experience
parity
pup retrieval
Colchicine, 147
conditioned emotional reaction
hippocampal granular cells
lesions, colchicine-induced
perforant path stimulation
Cold-water swims, 39
analgesia
gender-specific effects
gonadectomy
hypothermia
pain
stress
Common ions, 641
cross-adaptation
soreness intensity
Competitive behavior, 695
lesions, medial hypothalamic
operant aggression
testosterone implants
Conditioned emotional reaction, 147
colchicine
hippocampal granular cells
lesions, colchicine-induced
perforant path stimulation
Conditioned flavor aversions, 201
analgesia
centrifugal rotation
Corticosterone, 103
novelty stress, predictable
novelty stress, unpredictable
prolactin
temporal pattern
Corticosterone inhibition, 489
brown adipose tissue
2-deoxy-D-glucose
intracerebroventricular effects
thermogenesis
Corticosterone levels, 323
adrenaline concentrations
circadian rhythms
plasma noradrenaline
Counterconditioning, 7
barpressing, punished
lesions, dorsal noradrenergic bundle
stress tolerance
Courtship, 759
lesions, nucleus sphericus
lesions, septum
nucleus sphericus
reproductive physiology
septum
snakes
Cross-adaptation, 641
common ions
soreness intensity
Cuttlefish, 329
anterior basal lobe
lesions, anterior basal lobe
predatory behavior
Cyclic nucleotides, 75
energy metabolism
liver damage
stress, acute

DA metabolism, 383
DOPAC levels
ethanol
foot-shock
RO 15-4513
Deafferentation, 369
drinking
pharyngolaryngeal region
picric acid
Deer mice, 559
analgesic effects
locomotor activity
magnetic field inhibition
morphine
sex differences
Delta sleep-inducing peptide, 569
cats
electroencephalogram
sleep
subcutaneous administration
2-Deoxy-D-glucose, 489
brown adipose tissue
corticosterone inhibition
intracerebroventricular effects
thermogenesis
Developmental differences, 685
guppies
habituation
reproductive differences
sexual differences
Dexamethasone, 597
adrenalectomy
analgesia
selective breeding
Diabetes mellitus, 447
avoidance responding
social behavior
Diabetic rats, 655
diet composition
food intake
insulin
satiety
Diet composition, 655
diabetic rats
food intake
insulin
satiety
Diet palatability, 479
adrenalectomy
benzodiazepines
opiate antagonists
Dietary calcium, 425
hypertension
selective breeding
stress
Dietary fat, 483
human studies, females
menstrual symptoms
menstruation
Dietary self-selection, 155
carbohydrates
food intake
protein
tryptophan
Differential housing, 731
lesions, fimbria-fornix
postoperative environment
recovery of function
Differential reinforcement of low rates performance, 271
age differences
Dipsogenesis, 515
angiotensin II
calcitonin
ICV administration
third ventricle
Distal exposure, 47
Caesarian section
maternal behavior, postpartum
pup experience
responsiveness
Dogs, 171
blood volume redistribution
low ambient temperature
norepinephrine
plasma osmolality
thirst suppression
Dominant/subordinate relationships
aggression, 661
flank glandectomy, 661
hamsters, 661
mice, female, 689
plasma corticosterone levels, 689
scent marking, 661

social structure, 689
DOPAC levels, 383
DA metabolism
ethanol
foot-shock
RO 15-4513
Dopaminergic system
asymmetry, 607
behavioral lateralization, 785
brain asymmetry, 785
lateralization, 607
monoaminergic system, 785
spatial preference, 607
T-maze, 785
Dose-dependent effects, 767
activity rhythm
circadian rhythm
lesions, electrolytic
lesions, suprachiasmatic nucleus
methamphetamine
suprachiasmatic nucleus
Drinking
blood variables, 229
deafferentation, 369
early weaning, 673
ethanol, 673
human studies, 229
hypohydration, 229
opioid antagonist, 573
pharyngolaryngeal region, 369
picric acid, 369
portacaval shunt, 143
regulatory challenges, 143
route of administration, 573
stress responsivity, 673
SR58002C, 573
thirst, 229
ulcers, 673
voluntary consumption, 673
Drinkometer, 127
multiple channel amplifier
photocell signals
touch circuit
Drug
acetaldehyde, 393
acetylcholine chloride, 781
ACTH, 165
alcohol, 387, 393
amphetamine, 741
angiotensin II, 539
apomorphine, 607
atropine sulfate, 725
capsaicin, 337
CGS 8216, 479
clonazepam, 479
clonidine, 317, 747, 805
colchicine, 147
2-deoxy-D-glucose, 489
dexamethasone, 29, 597
diazepam, 479
diprenorphine, 479
dopamine, 607
epinephrine, 109, 337
ethanol, 377, 383, 407, 411, 673
FG 7142, 479
D-galactosamine, 75
glucagon, 337
6-hydroxydopamine, 247
indomethacin, 85
insulin, 357, 755
lithium chloride, 91, 259
methamphetamine, 767
methoxamine, 747
morphine, 559
naloxone, 1, 201, 207, 317, 597
naltrexone, 135, 479
norepinephrine, 171
penicillin, 617
phencyclidine, 805
polyethylene glycol, 143
prazosin, 317
propranolol, 555
RO 15-4513, 383
salsolinol, 393
scopolamine, 263, 805
SKF-10,047, 805
sodium salicylate, 637
SR58002C, 573
ST-91, 747
Sylvocaine, 463
tryptophan, 155
yohimbine, 317
$ZnSO_4$, 97
Drug comparisons, 337
capsaicin
epinephrine
food intake
glucagon
meal patterns
Drug interaction
alpha adrenoceptors, 747
catecholamine levels, 317
clonidine, 747
clonidine suppression, 317
methoxamine, 747
penile reflexes, 747
schedule-induced polydipsia, 317
sexual behavior, male rats, 747
ST-91, 747

Early development, 431
lactation
milk composition
milk quantity
strain differences
Early experience, 401
ethanol responsiveness
malnourishment
prenatal stress
Early weaning, 673
drinking
ethanol
stress responsivity
ulcers
voluntary consumption
Eating
adrenal development, 29
body weight gain, 29
calcitonin, 501
caloric load responses, 577
capsaicin, 337
carbohydrates, 155
castration, 25
cholecystokinin, 25
chronic noise stress, 29
diabetic rats, 655
diet composition, 655
dietary self-selection, 155
drug comparisons, 337
epinephrine, 337
estradiol, 25
glucagon, 337
gonadectomy, 25
human studies, obese males, 135
human studies, females, 577
hunger, 135, 577
insulin, 655, 755
insulinemia, 631
insulin-like growth factor, 755
intracerebroventricular administration, 755
meal patterns, 337
mealtime insulin response, 631
mealtime insulin naltrexone, 135
naltrexone, 135
palatability, 631
